Safety Instructions

- 1 Before connecting the AC power cord to the DC adapter outlet, make sure the voltage designation of the DC adapter corresponds to the local electrical supply.
- 2 Never insert anything metallic into the cabinet openings of the liquid crystal display (LCD) monitor; doing so may create the danger of electric shock.
- 3 To avoid electric shock, never touch the inside of the LCD monitor. Only a qualified technician should open the case of the LCD monitor.
- 4 Never use your LCD monitor if the power cord has been damaged. Do not allow anything to rest on the power cord, and keep the cord away from areas where people can trip over it.
- 5 Be sure to hold the plug, not the cord, when disconnecting the LCD monitor from an electric socket.
- 6 Openings in the LCD monitor cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Also, avoid using the LCD monitor on a bed, sofa, rug, or other soft surface. Doing so may block the ventilation openings in the bottom of the cabinet. If you put the LCD monitor in a bookcase or some other enclosed space, be sure to provide adequate ventilation.
- 7 Put your LCD monitor in a location with low humidity and a minimum of dust.
- 8 Do not expose the LCD monitor to rain or use it near water (in kitchens, near swimming pools, etc.). If the LCD monitor accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean the LCD monitor with a damp cloth when necessary, but be sure to unplug the LCD monitor first.
- 9 Place the LCD monitor on a solid surface and treat it carefully. The screen is made of thin glass with a plastic front surface and can be damaged if dropped, hit or scratched. Do not clean the front panel with keton-type materials (e.g., acetone), ethyl alcohol, toluene, ethyl acid, methyl, or chloride – these may damage the panel.
- 10 Locate your LCD monitor near an easily accessible AC outlet.
- 11 If your LCD monitor does not operate normally – in particular, if there are any unusual sounds or smells coming from it – unplug it immediately and contact an authorized dealer or service center.
- 12 High temperature can cause problems. Don't use your LCD monitor in direct sunlight, and keep it away from heaters, stoves, fireplaces, and other sources of heat.
- 13 Unplug the LCD monitor when it is going to be left unused for an extended period of time.
- 14 Unplug your LCD monitor from the AC outlet before any service.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER
(OR BACK).
NO USER-SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

Unpacking Your Monitor

Please make sure the following items are included with your monitor. If any items are missing, contact your dealer.

Warranty Card
(Not available in all locations)

Monitor

S-VHS Cable

Manual

Scart Jack

DC Adapter

Stereo-RCA Cable
(option)

Stereo-Stereo Cable

Remote Controller

Batteries
(AAA x 2)

RCA Cable

Setting up Your LCD Monitor

Setting up an Ergonomic Workstation

Consider the advice given below before you install your monitor.

Monitor location

Choose a position that exposes your monitor to the least reflection from lights or windows, usually at a right angle to any window.

Workstation height

Place your LCD monitor so that the top of the screen is slightly below your eye level when you are comfortably seated.

Viewing angle

Tilt the screen until you feel comfortable working with your monitor. The best viewing angle can be obtained via AutoAngle™ provided by enclosed **Colorific® software**. Please install the program to get the best viewing angle adjustment.

Figure 1. Tilt the screen

Kensington Security Slot

This monitor offers you the opportunity to secure your monitor using a Kensington-type security device. Kensington lock is not included. Refer to your locking device documentation for installation instructions.

Figure 2. Kensington-type security slot location

Setting up Your LCD Monitor

Connecting Your LCD Monitor

Figure 3. Cable connections

- 1** Connect the power cord to the DC adapter and connect the adapter jack to the DC12V power port on the back of your monitor.
- 2** Connect the signal cable to the video port on your computer.
- 3** Connect the RCA cable or S-VHS cable to your DVD, VCR or camcorder.
- 4** Connect the audio sources (computer, DVD, VCR or Camcorder) to proper Audio input ports (Ain(L), Ain(R) or Ain(stereo)).
- 5** Connect your external audio system to the Line-out port..
- 6** Connect your headphone to the Headphone-out port.
- 7** Turn on both your computer and the monitor.
- 8** If necessary, install the video driver for the monitor. (See "Installing the video driver" on page 6)
- 9** After your monitor has been fully installed successfully, run Auto-Adjustment. (See page 12)

* For SyncMaster 150MP/170MP only
(SyncMaster 150MP/170MP are products with a built-in TV tuner)

Setting up Your LCD Monitor

Plug and Play

The adoption of the new **VESA®** Plug and Play solution eliminates complicated and time consuming setup. It allows you to install your monitor in a Plug and Play compatible system without the usual hassles and confusion. Your PC system can easily identify and configure itself for use with your display. This monitor automatically tells the PC system its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the PC system can automatically configure itself to use the flat panel display. If your PC system needs a video driver, follow the instructions given below according to the operating system your computer uses.

Installing the Video Driver

The CD that accompanies this product contains the necessary drivers for installing your monitor. Please refer to the driver installation instructions included with your CD package for more information.

Self-Test Feature Check (STFC)

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. Make sure that PC is selected as a primary source by checking if the source indicator LED labeled "PC" is on. If your monitor and computer are properly connected but the monitor screen remains dark and the power indicator is blinking, run the monitor self-test by following the steps given below:

Figure 4. Power Indicator

- 1 Turn off both your computer and the monitor.
- 2 Unplug the video cable from the back of the computer.
- 3 Turn on the monitor.

Setting up Your LCD Monitor

If the monitor is functioning properly, you will see a white box with an error message "Check Signal Cable." in red color.

Figure 5. Monitor self-test screen

This box also appears during normal operation if the video cable becomes disconnected or damaged.

- 4 Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after following the previous procedure, check your video controller and computer system; your monitor is functioning properly.

Getting Help

If your monitor does not display an image, check your cable connections and refer to "Troubleshooting" on page 20. If you experience difficulties with the quality of the displayed image, run Auto Adjustment (see page 12) and refer to "Adjusting Your LCD Monitor" on page 8 or "Troubleshooting" on page 20.

Warm-up Time

All LCD monitors need time to become thermally stable whenever you turn on the monitor after letting the monitor be turned off for a couple of hours. Therefore, to achieve more accurate adjustments for parameters, allow the LCD monitor to warm (be on) for at least 20 minutes before making any screen adjustments.

Adjusting Your LCD Monitor

User Controls

Your LCD monitor allows you to easily adjust the characteristics of the image being displayed. All of these adjustments are made using the control buttons on the front of the monitor. While you use these buttons to adjust the controls, an on-screen menu shows you their numeric values as they change.

* 17" : SyncMaster 170MB

Figure 6. User control locations

No.	Name	Description
1	Source	<ul style="list-style-type: none">■ Selects Video source.■ Four source indicator LEDs on the left of the control button indicate currently active Video source.
2	PIP	<ul style="list-style-type: none">■ Activates PIP(Picture-in-Picture) window directly.■ PIP to Fullscreen video.■ PIP off.
3	Exit	<ul style="list-style-type: none">■ Exits from menus and sub-menus.■ Exits from the OSD system.■ Turns the PIP off.
4	Menu	<ul style="list-style-type: none">■ Opens the OSD and selects the highlighted function.
5	Power	<ul style="list-style-type: none">■ Turns ON/OFF the monitor.■ Indicates the status of the monitor.<ul style="list-style-type: none">-Green : Normal Operation.-Amber : Power Saving Mode or Disconnected Signal Cable.

Adjusting Your LCD Monitor

No.	Name	Description
6	▼ ▲	■ Moves the selector up or down on the OSD.
7	◀ ▶	■ Moves the selector left or right on the OSD. ■ Increases or decreases the values of the selected function.
	- VOL +	■ Increases or decreases the level of audio volume.

Automatic Save

Whenever you open the on-screen menu and allow an adjustment window to remain active for about 3 seconds without pressing other buttons, the monitor automatically saves any adjustment you have made. These changes are saved into a user area in the monitor.

SyncMaster 150MB and SyncMaster 170MB have 9- and 11- factory preset modes listed in Table 7 on page 26 respectively. In addition to these modes, five more video modes that are not in the table are stored in the internal memory of the product.

Adjusting Your LCD Monitor

Direct-Access Features

While you are watching full screen TV or in PIP mode

Volume		<p>When OSD is not on the screen, push the "◀" or "▶" button to adjust volume.</p> <ol style="list-style-type: none">1 Push the "◀" button to decrease the volume.2 Push the "▶" button to increase the volume.
--------	---	--

OSD Lock/Unlock

This function allows you to secure the current settings so that they cannot be inadvertently changed, while still allowing you to adjust the Brightness, Contrast and Volume. You can unlock the OSD controls at any time by using the same procedure.

With the **OSD** screen off, push and hold the **Menu** button for at least 5 seconds to lock or unlock the controls. When locked, a 'LOCKED!' message will be displayed along the bottom of each OSD menu except for these screens :

- Brightness
- Contrast
- Volume

Adjusting Your LCD Monitor

ON-Screen Display(OSD)

Figure 7. On-Screen Display(OSD)

Accessing the menu system

- 1 With the OSD off, push the **Menu** button to display the main OSD menu.
- 2 Use the " ▼ ▲ ◀ ▶ " buttons to move from one function to another. As you move from one icon to another, the function name changes to reflect the function or group of functions represented by that icon. See Table 1 starting on the next page to view a complete list of all of the functions available for the monitor.
- 3 Press the **Menu** button once to activate the highlighted function, then follow the Tool Tips to select the function and adjust the value.
- 4 Use " ▲ " and " ▼ " buttons to select the sub-menu, and press the **Menu** button once to activate the selected sub-menu.
- 5 After selecting a function, use the " ◀ " and " ▶ " buttons to make necessary adjustments. The setting bar moves and the numeric value indicator changes to reflect your adjustments.

NOTE: The numeric value indicator is provided as a point of reference only and has nothing to do with a real measurement.

- 6 Push the **Exit** button a couple of times to return to the main menu to select another function or to exit from the OSD.

	■ Position	Move the OSD Window to the vertical and horizontal direction.
	■ Halftone	Change the opaqueness of the background of the OSD.
	■ Duration	The number of seconds that the OSD will remain visible before disappearing.
	■ Beep	Enables or Disables the sound generated when you touch the control buttons.

By Remote-Control

PowerSaver

This monitor has a built-in power management system called PowerSaver. This system saves energy by switching your monitor into a low-power mode when it has not been used for a certain period of time. The available modes are "On", "Standby", "Sleep", and "Deep Sleep". PowerSaver operates with a VESA DPMS compliant video card installed in your computer. You use a software utility installed on your computer to set up this feature. See Table 2 below for details.

Table 2. Power-saving modes

State	Normal Operation	Power-Saving Function mode (EPA/NUTEK)		
		Standby Mode	Sleep Mode Position A1	Deep Sleep Mode Position A2
Horizontal Sync Vertical Sync Video	Active Active Active	Inactive Active Blanked	Active Inactive Blanked	Inactive Inactive Blanked
Power Indicator	Green	Amber	Amber Blinking (0.5 sec interval)	Amber Blinking (1 sec interval)
Power Consumption	150MB : 33W (Max.) 170MB : 52W (Max.)	Less than 3W	Less than 3W	Less than 3W

NOTE: This monitor automatically returns to normal operation when horizontal and vertical sync return. This occurs when you move the computer's mouse or press a key on the keyboard.

This monitor is EPA ENERGY STAR® compliant and NUTEK compliant when used with a computer equipped with VESA DPMS functionality.

For energy conservation, turn your monitor OFF when you are not using it or when leaving it unattended for long periods.

Troubleshooting

If you have a problem setting up or using your LCD monitor, you may be able to solve it yourself. Before contacting customer service, try the suggested actions that are appropriate to your problem.

Table 3. Troubleshooting – Image

Installing VESA compliant mounting devices

Refer to page 29 to fold the base

Align the mounting interface pad with the holes in the rear cover mounting pad and secure it with the four screws that came with the arm-type base, wall mount hanger or other bases.

Wall Mount Instructions

The following instructions apply to a hollow sheet-rock wall only Tools/Hardware needed - Philips screwdriver, four toggle bolts, 5/8in dia. Drill bit and drill. Contact Ergotron at (800) 888-8458 to purchase the triple pivot direct mount adapter and wall mount bracket kit.

- 150MB (15") : No. 47 - 007 - 099 (Pivot direct mount adapter)
No. 97 - 101 - 003 (Wall mount bracket kit)
- 170MB (17") : No. 47 - 007 - 099 - 02 (Pivot direct mount adapter)
No. 97 - 101 - 003 - 00 (Wall mount bracket kit)

Align the wall mount bracket on the wall at the desired height, making sure that the bracket will be mounted between the wall studs. Mark the four corner openings and drill four 5/8-dia. holes.

Assemble the wall mount kit according to the instructions provided with it.

Securely attach Ergotron's flat panel, triple pivot direct mount adapter to the back of the monitor using the four 4mm, .7 pitch x 10mm screws provided with the arm.

Secure the assembly to the wall using four 3/16 by 3-inch long toggle bolts.

Retractable Stand

*NOTE: *Please pull the rear retractable part of the stand when you tilt the monitor to the backward direction to give more stability. The maximum tilt angle is 15 degree to the backward direction. Please do not tilt the monitor other than specified range. **Excessive force to tilt the monitor other than specified range may give permanent damage to the mechanical part of the stand.***

Maintenance of Your LCD monitor

WARNING: To avoid risk of electric shock, do not disassemble the monitor cabinet (except for gaining access to the cable connectors as described on page 5). Users cannot service the monitor. User maintenance is restricted to cleaning as explained below:

Unplug the monitor from the power outlet before cleaning.

- To clean your flat panel display screen, lightly dampen a soft, clean cloth with water or mild detergent. If possible, use a special screen cleaning tissue or solution suitable for the antistatic coating.
- To clean the monitor cabinet, use a cloth lightly dampened with a mild detergent.
- Never use flammable cleaning material to clean your LCD monitor or any other electrical apparatus.

Attaching a wall or Arm mounting device

The monitor supports VESA mounting standard for use with various VESA mounting devices. To install any VESA mounting device, please follow the instructions given.

- 1** Lay the LCD monitor face-down on a flat surface with a cushion or other soft materials to protect the screen.
- 2** Remove the connector cover.
- 3** Remove any cable connected on the monitor.
- 4** Press "FOLD" button on the stand and tilt the monitor backward until the stand in up-right position.
- 5** Connect any cable you removed at step 3.
- 6** Place the connector cover removed at step 2.
- 7** Now you are ready to install Wall/Arm mounting device depending on your applications.

Regulatory Information

FCC Information

User Instructions

The Federal Communications Commission Radio Frequency Interference Statement includes the following warning:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television receptions, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

User Information

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

If necessary, consult your dealer or an experienced radio/television technician for additional suggestions. You may find the booklet called How to Identify and Resolve Radio/TV Interference Problems helpful. This booklet was prepared by the Federal Communications Commission. It is available from the U.S. Government Printing Office, Washington, DC 20402, Stock Number 004-000-00345-4.

Warning

User must use shielded signal interface cables to maintain FCC compliance for the product.

Declaration of conformity for products Marked with FCC Logo

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The party responsible for product compliance:

SAMSUNG ELECTRONICS CO., LTD

America QA Lab of Samsung

85 West Tasman Drive

San Jose, CA 95134 USA

Tel) 408-544-5124

Fax) 408-544-5191

Provided with this monitor is a detachable power supply cord with IEC320 style terminations. It may be suitable for connection to any UL Listed personal computer with similar configuration. Before making the connection, make sure the voltage rating of the computer convenience outlet is the same as the monitor and that the ampere rating of the computer convenience outlet is equal to or exceeds the monitor voltage rating.

For 120 Volt applications, use only UL Listed detachable power cord with NEMA configuration 5-15P type (parallel blades) plug cap. For 240 Volt applications use only UL Listed Detachable power supply cord with NEMA configuration 6-15P type (tandem blades) plug cap.

IC Compliance Notice

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations of ICES-003.

Cet appareil Numérique de classe B respecte toutes les exigences du Règlement ICES-003 sur les équipements produisant des interférences au Canada.

MPR II Compliance

This monitor complies with SWEDAC(MPR II) recommendations for reduced electric and magnetic fields.

European Notice

Products with the CE Marking comply with both the EMC Directive (89/336/EEC), (92/31/EEC), (93/68/EEC) and the Low Voltage Directive (73/23/EEC) issued by the Commission of the European Community.

Compliance with these directives implies conformity to the following European Norms:

- EN55022:1998 – Radio Frequency Interference
- EN55024:1998 – Electromagnetic Immunity
- EN61000-3-2:1995 + A1 + A2 – Power Line Harmonics
- EN61000-3-3:1995 – Voltage Fluctuations
- EN60950 – Product Safety.
